FLIGHT CASES AND TIMBER CRATES

FOAM INSERTS AND CUSHION PACKS

PERFORMANCE PACK MANUFACTURE

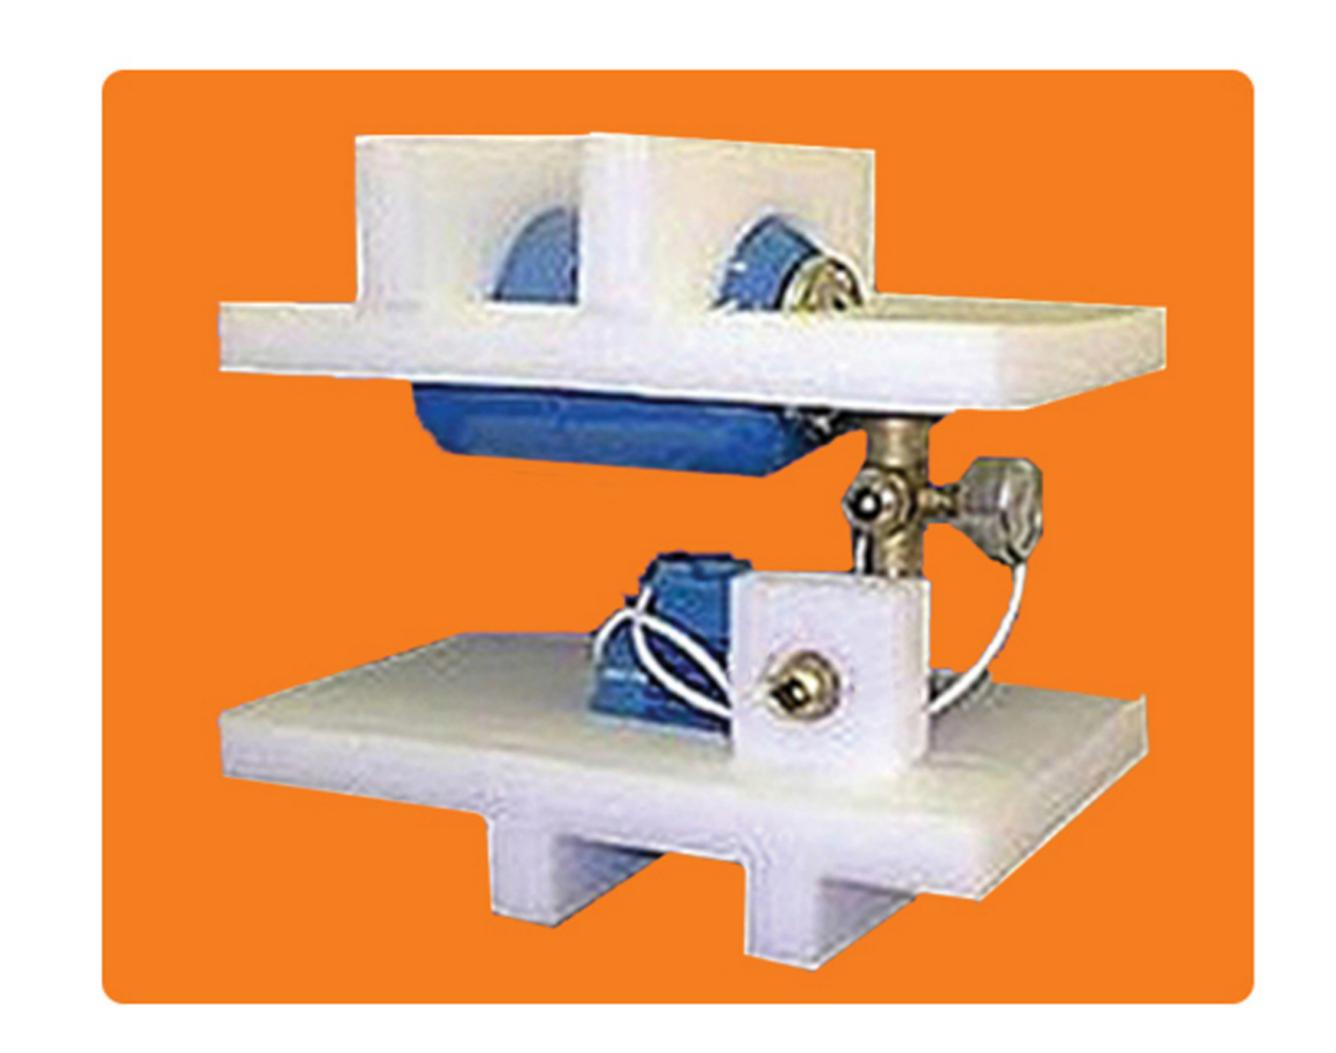

PLYWOOD CRATES

Plywood crates built to any size.
Either with or without pallet base.
Made to any size from Heat Treated
Timber - to ISPM 15 Standards - so
they can be shipped Worldwide with
no issues. Also available foam lined
and with hinged lids / carry handles
and locking catches - much cheaper
than a flight case!

FOAM SHEETS

We stock a full range of Polyethylene Foam in all thicknesses. These white semi rigid sheets are 2000 x 1200mm and come in a range of thicknesses from 12mm to 100mm. We can ship anywhere in the UK for orders of 3 packs or more. We also stock Polyurethane Blocks and can cut these down into sheets any thickness.

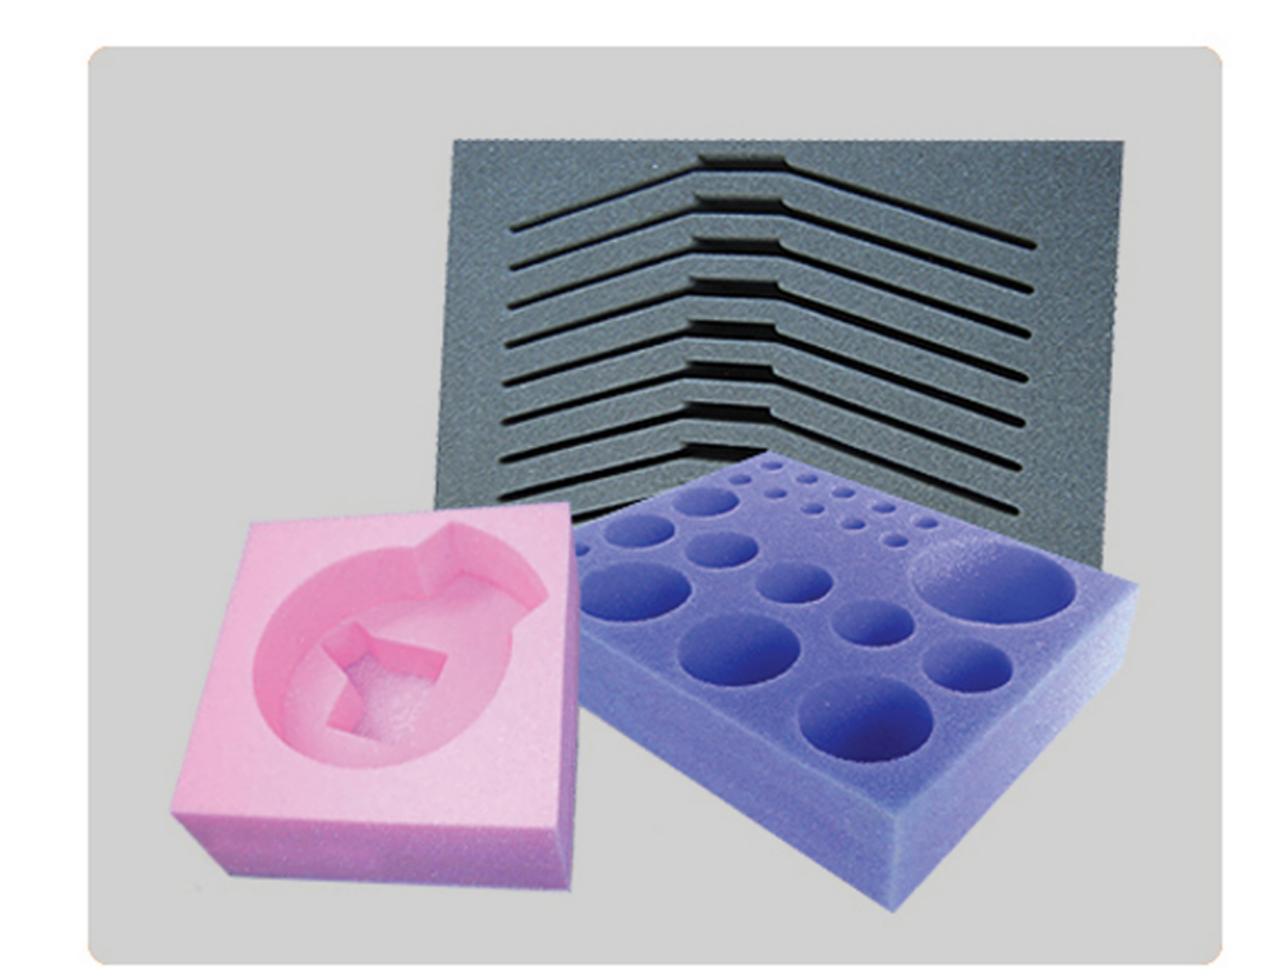

FOAM END CAPS

Polyethylene End caps are an excellent way to pack almost any product. These are cut and pressed and then heat welded together to create very resilient caps. These simply push over the ends of your product - and then you just drop them into a carton and seal it up. Almost unbreakable - excellent packs.

FLIGHT CASES

For Valuable equipment - why not consider a Bespoke Flight Case. Built to your specification and fully foam lined - the ultimate re-usable Outer Transit pack. We can build these with wheels, carry handles, or even built in loading ramps for heavier items. Please ask for advice on any Flight Case.

FOAM FITTINGS

We manufacture foam inserts from a range of different foam grades. We can cut and press almost any shape providing a perfect cushion around your product. This ensures safe transit in the UK or Worldwide. All foam production is done in our own premises - so we can respond quickly when required.

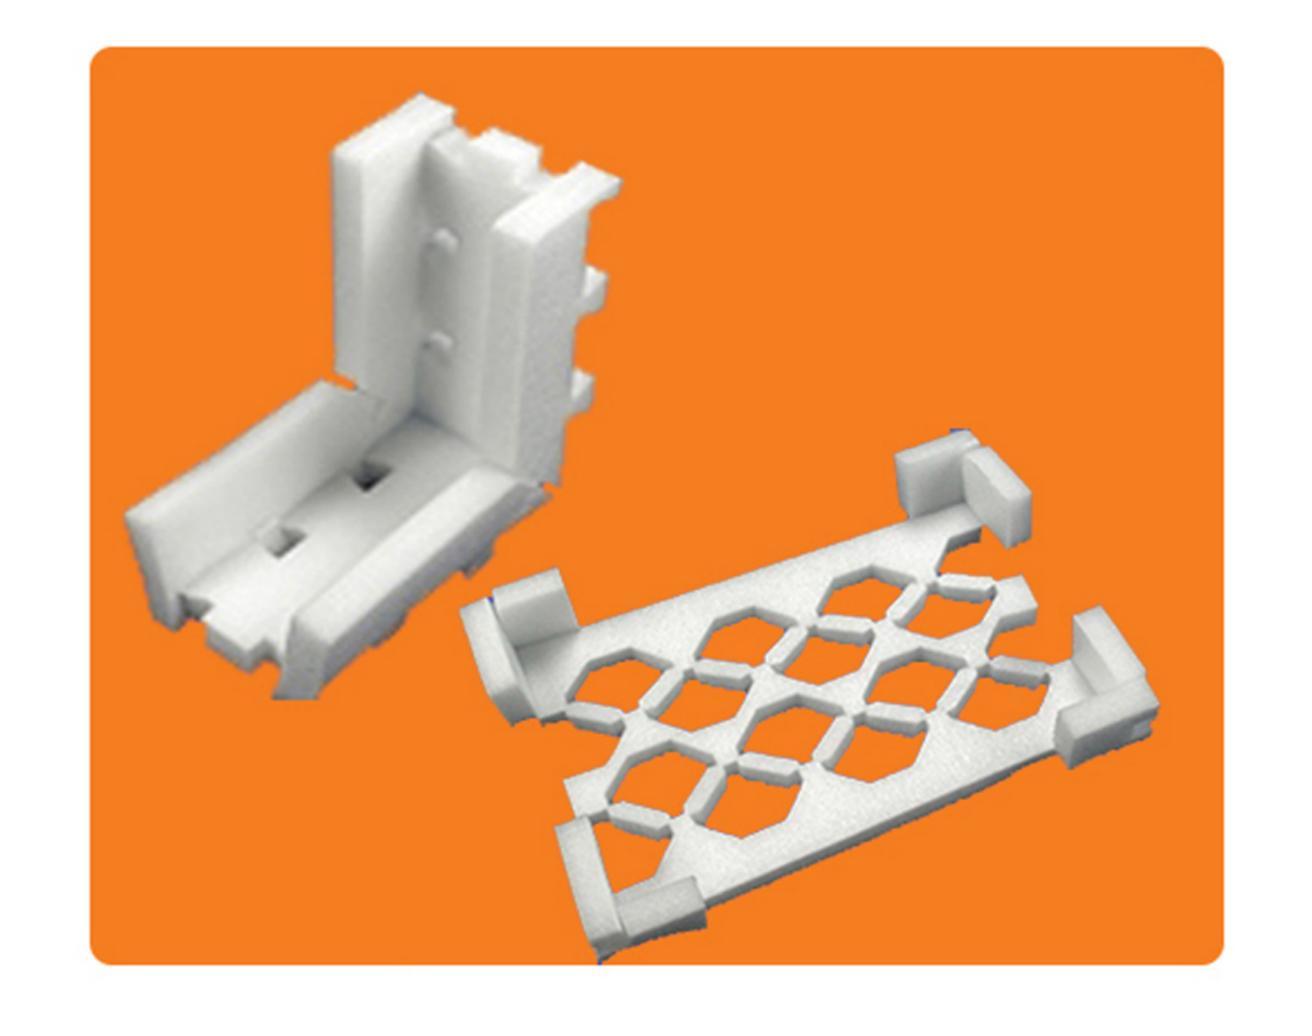

HEAVY DUTY

If you have large,heavy and awkward shapes - we can help.
See for example this car door.
We designed a pack using Heavy Duty cardboard - along with our Bespoke Foam Inserts to grip and cushion the doors in Transit.
Quick and easy to pack and offers a high level of protection.

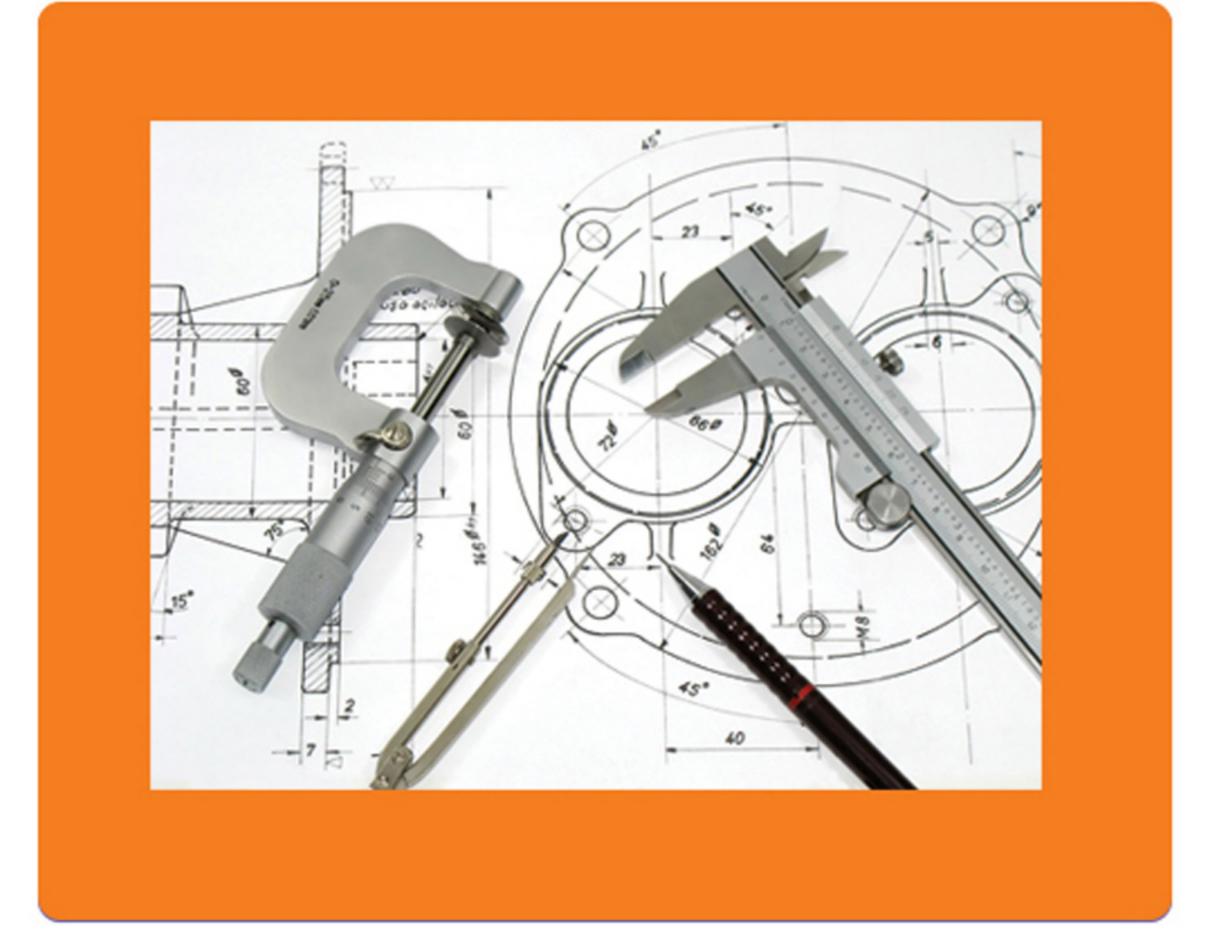

COMPOSITE PACKS

We can design a bespoke pack for any product. For example in the pack on the left we made a carton and then designed fittings made from board to separate the products - combined with foam inserts around the edges to allow suitable cushioning for the product whilst in transit.

DIECUT FITTINGS

We are manufacturers of "Hinged"
Stratocell foam inserts which can
be stored flat to minimise storage
and then simply "popped up" when
packing. This has the advantage
of both saving material - as well
as saving on storage space in your
warehouse. We can also make end
caps with hinged legs.

DESIGN SERVICE

For total peace of mind why not let us solve your packaging problems for you. Simply bring your product in to us and we will design a custom made pack offering you the correct level of protection.

With over 30 years experience in our field - we will come up with the right solution for you.
