Subject: Price increase

Hello John,

The Paper & Packaging industry, like many others, is experiencing unprecedented and ongoing cost pressures driven by supply chain challenges in many areas such as paper, transport, pallets and starch, alongside rising costs for fuel and energy amongst others. The result of this continuous pressure has led to significant increases in both raw material and input costs across all areas of our business and the scale of these exceptional costs leaves us no option other than to increase our selling prices accordingly.

As a result, we are writing to confirm that we will be increasing our prices by +14% effective for all deliveries on or after Monday 25th April 2022.

Whilst we appreciate this may not be welcome news, please be assured we are continually working to find ways to mitigate cost increases by driving efficiency improvements within our business.

Thank you for your valued business and continued support.

Best regards
