Dear John

RE: - Price increase.

As you are no doubt aware, we are faced with increasing costs for TDI, Polyol and other chemicals required in the manufacture of PU foam. The increases relate to tight supply, increases in feedstock prices and exchange rate issues with Sterling and the Euro.

With further added costs from the 1st January 2008, in addition to those absorbed so far, it is essential that we recover these. As a result, we will be increasing the prices of our foam products by the following amounts with effect from the 14th January 2008.

C. M. Polyether, C.M.H.R. and Standard Polyether Slabstock. 14%.
Visco elastic Slabstock. 8%.
Converted foam. 9.5%.

We are aware that this will be unwelcome news but we have no choice as general world shortages of oil have driven prices higher and demand for most of the chemicals used in the manufacture of our products is causing concern with regard to availability.

Yours sincerely.

Peter Jackson.
