13th October 2006

Dear John,

Price Increase

Over the last month we have been notified of rises in costs of TDI and Polyol, which have been driven by a short supply situation. This tightness of supply is due to the global move of chemical manufacturing and therefore capacity in Europe has been severely reduced, while in the Far East it continues to be increased.

Carpenter has, through its relationship with suppliers, secured continuity of supply but at higher costs and we are already paying more during October with further increases agreed for next month.

The extent of these increases leaves us with no alternative but to pass them on. As a result, with effect from Monday 6th November 2006 block foam will increase by 10.5% and converted foam prices will increase by 8%.

We know that price rises are unwelcome but our suppliers assure us that these are a Europe wide problem and will affect everyone using these materials.

We will contact you over the next few days to discuss this in more detail.

Yours Sincerely,

Carpenter Ltd
