Dear John

We hope you are safe and well.

Over the past nine months we have been faced with rapidly increasing prices on key elements in the manufacture and supply of our profiles, these being cartons, gas, electricity and transport. These combined account for over an 11% increase in the base cost of our foam products.

As a result of the above we have no option but to increase our prices by 5%. This increase will apply on all orders delivered on or after 1<sup>st</sup> February 2022.

We continue to work hard to keep any increases to a minimum. We look forward to continuing working with you in the coming months and years.

Stay safe.

Yours sincerely
